DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James A. Quinton on 03/15/2006.

The application has been amended as follows:

In claim 1, line 10, insert -- said substantially nonintersecting path having an overlap of 20% or less;-- after path.

In claim 2, at the end (just prior to the period) insert – and said overlap is 10% or less. –

In claim 22, line 10, insert -- said substantially nonintersecting path having an overlap of 20% or less;-- after path

Allowable Subject Matter

Claims 1 – 27 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 1 recites a side pumped laser structure including the specific structure limitation of *electromagnetic radiation propagating though said lasing rod on a plurality of substantially nonintersecting path; said substantially nonintersecting path having an overlap of 20% or less; said path traversing said lasing rod perpendicular to the direction of propagation of the energy in the laser cavity*, which is neither anticipated or disclosed nor suggested in any piece of available prior art, which is neither anticipated nor obvious over the prior art of record.

Claim 22 recites a pumped laser structure including the specific structure limitation *electromagnetic radiation propagating though said lasing rod on a plurality of substantially nonintersecting path; said substantially nonintersecting path having an overlap of 20% or less; said path traversing said lasing rod perpendicular to the direction of propagation of the energy in the laser cavity; a hallow tube surrounding said lasing rod for cooling water to flow within said tube to cool said lasing rod; of hollow tube having a high reflective coating said coating reflecting electromagnetic radiation propagating on said plurality of substantially nonintersecting paths for further pass*

through said lasing crystal and high reflective coating having slits aligned with said radiation outlets to allow, electromagnetic radiation propagating on said plurality nonintersecting paths to pass through said coating, which is neither anticipated nor obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
